Leininger Captures Spotted Gilt Championship 5th Straight Time

HARRISBURG — C. Warren Leininger of Denver R2 won his fifth consecutive Farm Show Spotted Poland China grand championship Tuesday with his senior spring gilt Miss Ideal. She was sired by High Pattern, a boar bred by Ray Fisher in Ohio, and she is currently bred to Leininger's Commander's Pride.

Another Leininger gilt, Sally Ann, took the junior spring gilt class, but lost out for the reserve champion title to the senior gilt shown by William Kauffman of York R3.

Leininger, the only Lancaster County breeder entered in the show, placed six gilts in the money He won two firsts, one second, one third, one sixth and one eighth place.

Judging the event was George Corron, swine breeder from McComb, Ohio

(See Photo Page 8)

Lancaster Co. Showmen Take Bull Titles, But Go Dry In Cow Classes

HARRISBURG — Although Lancaster County Holstein breeders weren't able to take any of the top spots in other breed classes, they began the Holstein show by capturing the grand and reserve champion bull titles.

Penn Springs Leader, owned by Robert H. Kauffman of Elizabethtown R1, topped the senior yearling class, then went on to take the big title. Reserve champion and runnerup in the senior yearling class was Kerchenhill Shamrock, entered jointly by John Esh of Lancaster County and Raymond A. Seidel, Berks County.

Kauffman's Leader was sired by Mooseheart Pioneer. His dam was Kauffman's six-year-old cow Regal Lucy. Leader's win brought Lancaster County its first top bull title since 1951.

No other first place wins went to countians, but an assortment of thirteen ribbons was garnered in ten other classes.

County results:

Yearling Bull Calf — 1, Robert H. Kauffman (grand champion); 2, Raymond A. Seidel and John Esh, reserve champion).

Senior Yearling — 4. Susan Ann Kauffman, 6, Edwin E Hess.

Three-Year-old Dry Cow — 4, Robert H. Kauffman.

(Continued on Page 9)

Hess And Hess Dominate 4-H Lamb Show

Seventeen-year-old Tom Hess of Leola R1, gave Lancaster County its fourth straight grand champion trio title Thursday night with his pen of three homebred Hampshire lambs.

Fred Hess, also of Leola R1, had the grand champion individual, giving the Red Rose 4-H Lamb Club its fifth consecutive Farm Show title in that category.

Tom is a senior at Manheim Township High School, and his cousin Fred is a 1965 graduate of Warwick Union High School.

The champion Hess animals were all bred by Green Meadow Farms of Leola R1.

Brother Act "Steals" 4-H Baby Beef Title At The 50th State Farm Show

It was a good day for two young brothers from Bedford County Thursday at the 4-H Baby Beef Show as they combined their efforts to win the grand champion title.

It was also a good day for reporters, hungry for good human interest stories, as the brothers from Bedford stole the show by capturing the imagination of the public as their story unfolded

For all practical purposes, the story began last November when 11-year-old William Davis became the youngest showman to ever win the steer grand championship at the Pennsylvania Livestock Exposition Young Davis, in his first year of show competition, handled his steer like a professional.

Came Farm Show time, excitement, and some food that may have not been too well accepted, and Bill got sick the day before the big show In true storybook fashion, nine-year-old brother Robert, with no official show circuit experience, stepped into the gap and showed his brother's steer all the way to the title, beating out 152 other contenders!

The reserve title went to another young, but seasoned,

(Continued on Page 8)

Ribbons Only for Co. Ayrshires At Farm Show

Lancaster County Ayrshire breeders were shut out of the top titles at this year's Farm Show for the first time in eight years Last year's 4-H grand champion shown by Judy Flory was noticeably absent from this year's competition.

In the ribbon department however county Ayrshire showmen held their own with a total of thirty-six ribbons, including eight first place wins.

Grand champion female was

Weekly Poultry Report

Eastern Pennsylvania And New Jersey

WEEKLY SUMMARY

LIVE HENS

Prices on light hens unchanged to ¼c higher. Demand good. Offerings barely adequate and lighter than anticipated in some areas. Interest good for limited offerings of heavy type hens. Isolated at-farm purchases noted at 21c. However, increased shipments from North Carolina noted in instances. Prices paid at farms: Light hens 8½-8¼c; Heavy hens, too few to report.

TURKEYS

Supplies well cleared. Occasional lots of heavy toms noved at 25-25½c. Most seasonal processing and trading activity completed. However, some flocks continue to be moved from Delamarva and Ohio at undetermined prices where contractual growing arrangements are in effect.

Fogelsville

January 11, 1966

(Prices for dock weights, cents per lb. except where noted)

Hens, light type, range 7½-9, mostly 7½-8½; Hens, heavy type, 8½-22, mostly 14-20; Pullets, 20-32, mostly 27-31; Roasters, 9½-28½, mostly 20-28; Ducks, 24½-28½; Drakes, 13-36, mostly 28½-34½; Geese, 29-34; Turkeys, toms, 15-23, mostly 20-23; Turkeys, hens, 24½-30; Rabbits, 36-51, mostly 44-50; Guineas, 31-55; Pigeons (per pair), 65-1.50, mostly 65-75;Jumbo Squab, 75-85, mostly 85; Total Coops Sold: 822.

Eastern Shore Exchange

WEEKLY SUMMARY

Broiler and fryer live prices on the Eastern Shore Exchange this week averaged 18.67 cents per lb., up 2.68 cents from last week's average.

Prices paid ranged from a low of 16.4 cents on Monday to a high of 20.7 cents on Thursday.

Sales for the week totaled 1,165,400 head, a loss of more than 200,000 head from last week's totals.

Delmarva

January 14, 1966

Prices Jump

Delmarva broiler and fryer live prices advanced more than 1 cent to levels comparable with January 29 and February 27, 1962.

Demand very good for moderate auction offerings. Live supplies short of needs.

Ready-to-cook demand very good. Commitments for next week light, but over-all interest good.

Delivered prices continue to advance in response to increased live costs.

Estimated slaughter for Friday and Saturday, 988,000 head, compared to 1.7 million head last weekend.

In the 24 hours preceding market close on Friday, prices paid at farms for broilers and fryers ranged 18.5-20.7 cents per lb. and reported purchases totaled 897,000 head.

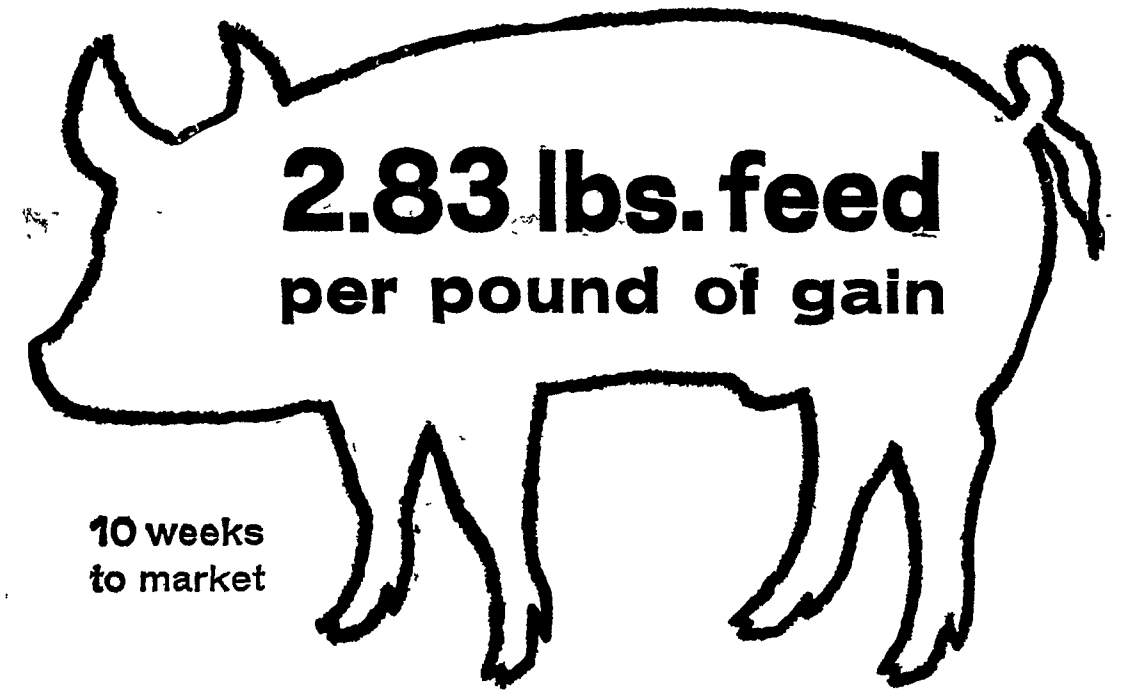
CHICAGO FIRE

NEW YORK — The great Chicago fire, which occurred Oct 8-10, 1871, destroyed 17,430 buildings and did an estimated $175 million in damage, according to the Insurance Information Institute.



...with Ful-O-Pep Gro-Pork 45 and grain

LESS THAN 3 LBS. of total feed to produce a pound of pork. That's real efficiency...using Ful-O-Pep Gro-Pork 45 Supplement and local grain. Eight lots of hogs averaged a 2.83 conversion at the Ful-O-Pep Research Farm.

2.78 WHEN REPEATED—The next 8 lots of hogs fed out on Ful-O-Pep Gro-Pork 45 Supplement and grain proved the efficiency of this feed once more. Average conversion? 2.78 lbs. of feed per pound of gain.

It's worth trying Ful-O-Pep...for the extra efficiency you get. Put your next hogs on Gro-Pork 45.

Ful-O-Pep Is the feed of efficient feeders

From Where We Stand . . .

New Water Costs More Than Old Water

An article appearing in a major, nationally circulated magazine recently suggested the so-called "water shortage is a phony". The author says that no matter what the population problems, we will not run out of water in the next one hundred year. Perhaps we won't. But in light of the general public ignorance regarding the need for conservation of our natural resources, we seriously question the wisdom of an article which might create greater public apathy on this vital subject.

In all fairness to the author, he differentiates between the general uses of water. He says that irrigation water is the critical use, while city water is no major problem. His point is that we can afford to "manufacture" water for our cities at a reasonable cost, but distilled water for crop irrigation would increase the retail price of vegetables fourfold. He also points out that city water can be reclaimed and reprocessed after it is used, but irrigation water is used up through evaporation.

There is no question but that we will handle water entirely differently in the future. It will be extensively reprocessed; it will be distilled from the sea in quantity; and it will be somehow transported from areas of plenty to areas of need. But it **WILL** also be the cause of major concern and the cause of many critical problems.

The nation right now is spending nearly $100 million a year on water research; approximately $75 million of this comes from federal funds. Rather than glibly look at the water situation from agricultural and non-agricultural points of view, it makes more sense to talk about quantity and quality of our water supply. As a further breakdown, how much, and what kind of water does a population of 200 million need? Not want, but NEED These figures can be computed with a fair degree of accuracy. But like the new school that's already inadequate by the time it is completed, the totals will have to be steadily recalculated to keep pace with a thirsty, growing population.

It is a problem which we will solve because the continuance of life in America, and in the rest of the world, demands that we solve it We do not intend to be alarmists on this question, but it is equally frightening, and intolerable, to hear the subject treated with complacency by those in a position to influence an already water-logged public opinion

The advertising wizards say that one slogan is worth a thousand words. May we suggest the motto "Don't be a drip! Conserve Water."

Farm Show's A Record Breaker!

At least that's the way it looks at press time with only 35,000 more people needed for Friday's attendance to break the whopping 690,000 total attendance record set in 1963.

With the exception of Thursday's feeble moisture effort, fair skies prevailed all week and the Farm Show Weather failed to live up to its formidable reputation.

The white stuff on Thursday, plus the weatherman's freezing rain prediction, did cut crowds that day down to 140,000, smallest of the first four days. But some of those who would ordinarily have attended on Thursday are expected on Friday, thus the prediction of a record breaking total attendance figure. And it is very fitting that the 50th anniversary of the Farm Show should be so well received by the public.

Secretary of Agriculture Leland H. Bull said this year's booming attendance of the Farm Show "indicates a growing public interest in agriculture, and (an awareness of) its importance to our expanding population."

★ ★ ★ ★

Select Chicks That Will Keep Poultry House Dry — Researchers at Texas A & M are conducting studies to see which strains of birds will produce drier droppings and maintain present egg production levels. They have found that water consumption and moisture are genetically related to different strains of birds; but they now need to find the relationship between water excretion levels and the economic performance of the birds.

★ ★ ★ ★

Motor vehicle death totals vary sharply for different days of the week and different months of the year, according to the National Safety Council. Saturday is the worst day and Tuesday is the best. Deaths are at their lowest level in January and February, then increase steadily to a summer peak.

★ ★ ★ ★

FBI Director J. Edgar Hoover says: "We seem to be witnessing a moral deterioration in our population. It is seen in those who are willing to compromise their ideals if an easy dollar can be made, and it can be seen at work in everyday life where a citizen will obey the law himself, but will also passively tolerate immorality and disrespect for authority within his own community. . . People have got to realize that if they deal with illegal gamblers, smut peddlers, and other merchants of the underworld, they are helping to support the organized crime complex"

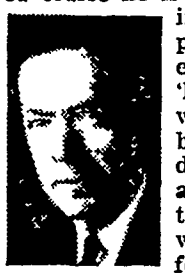
Lesson for January 16, 1966

Background Scriptures: Leviticus 19 1, 2; I Chronicles 29 10-19· Psalm 29, Isaiah 40 21-31; 55 8 9 Acts 17 22-31; Romans II: 33-36, Revelation 4 6b-11. **Devotional Reading:** Psalm 97.

IF YOU STOP a dozen Christians on the street or on the way home from church, and ask them: Do you believe God is holy? They will all give you an odd look that means — What a silly question! Of course he is holy. But then



if you asked these people just what exactly does 'holy' mean? You would run into a blank wall. If ordinary believers are confused by this word, no wonder, for professional theologians themselves are not agreed about the exact meaning of it. Probably the best suggestion is that holiness in the Bible has two meanings: for one thing, it stands for the highest degree of goodness, the closest following of the will of God. The other meaning is lofty even if obscure: it stands for those qualities in God which a man can never understand and cannot fully share. It stands for God's apartness, his indescribable greatness, for all the mystery and majesty of his sublime Being. God's holiness in his "otherness," what is technically called his "transcendence."

God alone creates

The Saturday Evening Post a few years ago carried an article by a famed theologian of our time in which he said that God does not exist. This shocked a great many readers, who did not read on to see what the writer meant. Just look at any object in sight — a window-plant, your own hand, a glass of milk, the mercury in a thermometer . . . . These things and uncounted millions more exist. God is as real as they are, and much more so indeed. But God "exists" in such a different way that some theologians (including the author of the article) do not like to use the same word for it. The fact is, we believe in God first of all as Creator. You would not have to rearrange the universe much to wipe out the entire human race; but even if you wiped out the universe down to the last atom, God would be just as great as ever, and just as able to create all over again.

Words that point at God

One way in which men have tried to speak of God is to use the noblest and strongest words imaginable — glorious, just, merciful, wise, victorious and many others, and say that God is all these things PLUS. God is greater than the greatest we can imagine, more powerful than any power dreamed by man, good to a degree we can never appreciate. Language about God is (so to speak) thrown at him rather than fitted around him. God's holiness is this beyondness, this more-ness, this most sublime, this all-highestness which our human languages can only suggest and never describe.

Stand in awe

The writers of the Bible dare not to be too familiar with this majestic and holy lord of all. A common word used in the Bible to describe the attitude toward God that is the basis of religion itself is the word "fear." We read of God-fearing men. The fear of the Lord is the beginning of wisdom, and so on. This does not mean terror. God is not a big Scare. It does mean the most profound reverence. Another word for what is in the heart of a man who sincerely wishes to worship this one true God, a better word than fear, is awe. Awe has been described as a mingling of desire and dread. The true worshipper never forgets the overwhelming greatness of the Almighty, and so never treats God like an equal. But unlike those African tribes who know of the High God, but have no desire to meet him, the Christian feels in the midst of his embarrassment and even fear in the presence of the Eternal Mystery, the drawing power of the Divine Love.

SMITH

To Apply Brush and Stump Sprays

Winter is a good time to use chemicals on brush and stumps When used during the dormant season on trees and shrubs that are to be eliminated, we remove most of the danger of damaging growing crops A mixture of the esther form of 2,4-D and 2,4,5-T will do a good job of killing most any tree or stump, one pound of this chemical to eight pounds of fuel oil will make a good mixture to be used during cold weather.

To Cull Low Producers

Production costs are at the point where dairymen cannot afford to keep low producing cows; the overhead on most herds require the keeping of cows that more than pay their expenses. The enrolling in a production testing association or service is the best way to learn what cows in the herd are not paying a good return on the investment.

To Provide Minerals For Ewe Flock

Winter care of the ewes is very important for both a good wool clip and a good lamb crop The supply of calcium and phosphorus is overlooked many times when grass hay is fed to the flock. When we feed good quality alfalfa hay, since it is high in minerals, the need is satisfied. However, with poor quality hay or with grass hay we suggest the feeding of a mineral mixture in addition to free choice of salt. The mineral mixture may be equal parts of ground limestone and steamed bonemeal, or the purchase of di-calcium phosphate. Either of these mixtures contain both calcium and phosphorus, which are needed for the ewes.

To Order Vegetable And Flower Seeds

The weather hasn't encouraged us to think about gardening but in order to get the quantity and quality of seeds desired, we suggest that the order be placed soon. The preference for cer-

Res. Champion Belgian Shown By Elmer Lapp

HARRISBURG — Elmer D Lapp Kinzer R1, a veteran of 20 years in exhibiting Belgian horses at Pennsylvania Farm Shows, won his second reserve championship Monday

Lapp's seven-year-old was the reserve senior champion stallion The horse, Tipsee's Bill also won the same title here three years ago

In addition to the reserve championship, Lapp entries won second place in get of sire and three fourth places, in 3-year-old mare, stallion, and two mares, and in two mares judging

Both the grand champion stallion and mare were entered by Charles B Orndorff and son, Waynesburg.

Weather Forecast

The five-day outlook for our area calls for temperatures to average within the normal range of 39 to 24 degrees, with overnight lows getting down only to the upper teens. It will be mild during the first part of the period, turning colder about Monday.

Precipitation is estimated at ½-¾ inch melted occurring Sunday night or Monday, as the colder weather moves in.

Pa. Yorkshire Breeders Elect Officers For '66

HARRISBURG — Pennsylvania Yorkshire breeders have changed the name of their state organization from Yorkshire Club to the Pennsylvania Yorkshire Cooperative Association.

Officers elected at a meeting at the 50th State Farm Show were: President, Reno H Thomas, Beavertown, Snyder County; vice-president, John Henkel, Strasburg R1; secretary, Wellington A. Hiester, Fleetwood R3; Berks County; directors, Donald States, Homer City R2, Indiana County; Curtis Roth, Kempton R1, Berks County, Clair Flinchbaugh, Felton R1 York County, Herbert E Myers, Hatfield R1, Bucks County, Park Thomas, Beavertown, Leon Arnold, Lebanon

STOLEN CARS RECOVERED

NEW YORK — Although more than 90 percent of all automobiles stolen in the United States are recovered, according to the Insurance Information Institute, about 30 percent of the recovered cars have been damaged or stripped of parts — many to the extent that they represent total losses

"OLD HICKORY"

A tall Pennsylvania hickory pole was the source of a cane used by President Andrew Jackson. Judge Daniel Dingman of Pike County cut the pole, and floated it to Easton by raft. It later became a flag pole on Mt. Jefferson. When it was taken down, canes were made of it. One of these was presented to the Judge, and another, given to Jackson, now resides in a Washington museum.

Let's have less tiger in the car and more human care.

Effects Of Corn Viruses May Be Reduced Through Earlier Planting

HARRISBURG — Early planting of corn may help reduce the danger of loss from Maize Dwarf Mosaic, a relatively new corn virus according to Henry F. Nixon, director of the Bureau of Plant Industry, State Agriculture Department

Speaking at the annual banquet of the Pennsylvania Crop Improvement Association Tuesday evening, Nixon said recent studies in Missouri indicate the effect of this virus is usually more severe in late planted fields "Farmers should, therefore, be encouraged to plant early where Maize Dwarf Mosaic was present last year," he added

This virus, he explained, was first noticed in Ohio in 1963. First evidence of its presence in Pennsylvania was found August 6, 1965, near Lock Haven, by Dr. Clifford C. Wernham, plant pathologist at Pennsylvania State University. By mid-October, Nixon added, it had been identified in 20 more counties of the state, including Lancaster.

In addition to Maize Dwarf Mosaic, two other viruses are of concern today, Nixon told members of the Association He identified them as corn stunt virus and red stripe, the latter spread by a mite carrying wheat streak mosaic The most serious losses he added apparently stem from a combination of Maize Dwarf Mosaic and red stripe

Maize Dwarf Mosaic — or MDM as it is known — is transmitted by aphids from infected plants to healthy ones with Johnson grass serving as an intermediate host for the virus There is no evidence Nixon said, that MDM is seed borne

Studies are underway, he told the group, to determine if native Pennsylvania grasses or fodder left in fields are capable of harboring the virus over winter Research also is directed toward development of new corn varieties "that will show a high degree of resistance to MDM." Nixon concluded.

County Posts 14 Homemaking FHA Winners

HARRISBURG — A total of 199 Pennsylvania High School vocational homemaking girls — including 14 from Lancaster County — received the highest state award for excellence Wednesday from the State Future Homemakers of America here

The awards were certificates granting the prized Future Homemaker degree They were presented by FHA officers during the school girl organization's annual farm show meeting in the forum of the Educational Building.

The degree is awarded to FHA members who have attained outstanding records in activities for advancement of their local, state and national organizations during the past year

Local girls receiving degrees Wednesday were

Penn Manor High School — Rachel S Breneman, Andrea Lou Emig, Shirley May Habecker, Naomi W Metzler and Deborah Arlene Shank.

Manheim Central Senior High School — Sue Ann Gibble and Dorothy G Nolt.

Hempfield Union High School — Carol Ann Hollinger, Martha Ann Nolt and Carol Lucille Peiter

Cocalico Senior High School — Janice Eileen Imhoff

Ephrata Union High School — Barbara Crouse Moore

Garden Spot High School, New Holland — Janice W. Musser

Elizabethtown Area High School — Carolyn Marie Sands Miss Imhoff is state parliamentarian of the state organization

Kenneth M Pfeiffer, assistant director of state vocational education, extended greetings to the more than 1,200 delegates from the FHA chapters.

The group now numbers 14,000 members in Pennsylvania.

County Growers Win In Tobacco Competition

Lancaster Countians got off to a good start Sunday at the Pennsylvania Farm Show by sweeping all competition in the tobacco show.

Roy M Rohrer of Strasburg R1, a 28-year Farm Show veteran, won his eighth championship with his cigar filler leaf exhibit

Wrapper leaf honors went to Melvin L Long, Lititz R3, for his long wrapper entry.

In the vocational competition Richard Thomas of Millersville R1, winner of the filler classes in the county 4-H and vocational shows during the past two weeks, had the winning wrapper entry in the Farm Show FFA Division Winner of the FFA filler class was Paul Souders of Conestoga R1

The 4-H division was led by Nancy Nestleroth of Manheim R3 with her wrapper entry and by Donald Thomas of Millersville R1 in the filler category

Judging the tobacco exhibits was Harry S Sloat former Lancaster County associate agent

Mixtures and Fiber Blends

A fiber mixture is achieved after spinning by twisting together two or more strands of spun yarn or continuous filament. A fabric mixture may be made up of a mixturn of yarns, different single yarns laid side by side, or warp yarns of one fiber and filling yarns of another.

Fiber blending is done before spinning a yarn from exact proportions of different fibers. A blend may be made up of manmade and natural fibers, combinations of manmade fibers, or combinations of natural fibers.

The washability of any fabric woven from mixed or blended yarns depends upon the fibers involved and/or on the finish applied to the fabric after weaving.

Ritchie Dealer For Hogs And Beef Cattle

Extra copy pages of 4-H 219 with 39 cents. Yes this is only available—but it does clearly explain many feeding terms used by Ritchie representatives when recommending your feeding program. Ritchie is a balanced commercial supply company that specializes in serving Pennsylvania and New York dairymen as well as 10 times as many beef cattle as there are dairy cattle. Ritchie Dealers work 24 hours a day—and usually find time for feeding to the opening of the stanchioned stud or water supply. Remember, water is our cheapest feed! Give your animals fresh temperature regulated fresh water the way they like it—cool in the summer and pipeline it in operation in the winter—for quality Ritchie Values. Your choice of 72 different rations in 22 models. Our exclusive business since 1921

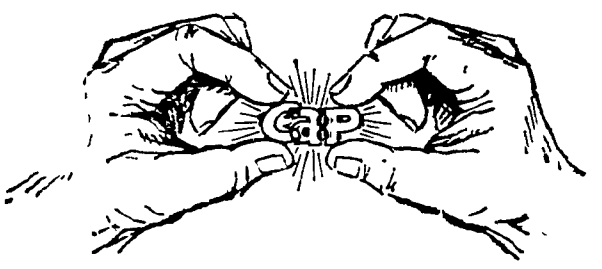
Beacon now offers dairymen a

NEW CONCEPT

in dairy nutrition to promote

- **Better Herd Health**
- **Cow Longevity**
- **Higher Milk Production**

All Beacon dairy rations are now formulated with new narrower, scientifically balanced calcium:phosphorus ratios that are experimentally proven.



Beacon dairy rations now carry 15% more **total** phosphorus and 30-40% more **available** inorganic phosphorus than previously. The new phosphorus source is more soluble in the digestive tract and thus has greater biological availability.

The new availability and new higher levels of phosphorus plus the narrower calcium:phosphorus ratio mean better digestibility of the total ration, more efficient calcium utilization (important to bone formation and milk production) and are helpful in keeping calcium blood serum values above the level where milk fever occurs. Higher available phosphorus also means better conversion of carotene to vitamin A.

Other improvements include the addition of magnesium (needed for proper body metabolism and to prevent grass tetany) and zinc (important in hide and hair health).

These changes bring dairymen better nutrition for their herds, will improve the utilization of many nutrients and promote better herd health and productivity.

We have full information on all Beacon dairy rations. Why not call us today?

The reserve grand champion, a 35¼ pound Tom exhibited by Harry Lamparter, Mountville, sold for $17.50 a pound The buyer was J C. Snavely and Sons, Inc., Landisville

The two birds were auctioned off by Omar Landis, Manheim, as a feature of the Pennsylvania Poultry Federation banquet in the Penn Harris Hotel

Lamparter won the title in both 1960 and 1964 He took 13 ribbons, including two blues, in the five-class competition Wednesday.

County Results

Heavy toms — 1, Harry Lamparter, (reserve champion).

Lightweight toms — 2, 3, 5, Harry Lamparter.

Heavy hens—2, 5, 6, Harry Lamparter.

Medium weight hens — 1, 2, 3, Harry Lamparter

Lightweight hens — 4, 5, 7, Harry Lamparter.

Vicki Shank Repeats Farm Show Egg Win

HARRISBURG — First prize for white eggs in 4-H competition was won by Vicki Shank, Elizabethtown R1, Lancaster County, at the 50th State Farm Show.

But Vicki didn't stop there, she went on to win the second, third and fourth places in the 4-H white eggs class. She was also last year's Farm Show winner in 4-H egg competition.

In the 4-H brown eggs contest Delbert Hauck, Hegins, Schuylkill County, took both first and second prize. Delbert also had the top score, 97, of single dozen brown eggs in the whole show

Eggs are scored on uniformity of weight, color, shape shell texture, condition and interior quality.

Nancy Ann Martin

James K. Will

Pa. Holstein Association Honors Outstanding Boy And Girl Of '65

The 1965 Pennsylvania Holstein Girl, Nancy Ann Martin, Lionville, and Holstein Boy, James K. Will, of Berlin-Brothersvalley Jt. High School, Jim has been farming with his father, but is planning to attend Penn State and study agriculture. He has served as Junior leader for his 4-H club the past 3 years, President of the Brothersvalley FFA for 1964-65, Vice President of the county FFA and is State FFA Vice President of Region IV for 1965. Additional activities have seen Jim play in the state FFA band for 3 years, the National FFA band in 1964, speak at many occasions and win the local FFA public speaking contest, and stand in the winners circle of the dairy showring many times. Hobbies of skiing and piloting his own airplane round out Jim's activities in becoming 1965 Pennsylvania Holstein Boy.

Berlin, were named during the 1966 Pennsylvania Farm Show. The announcement came at the annual Holstein Farm Show Breakfast program held on January 12. The award is the highest honor given to Junior members by the Pennsylvania Holstein Ass'n. and symbolizes excellence in activities, leadership, and establishing a Registered Holstein herd.

Nancy, 18, a Chester County 4-H'er is the daughter of Mrs. Charles H. Martin, Lionville. She has been very active in 4-H during the past 8 years, serving twice as president and twice as assistant leader. She has worked to promote milk and the dairy industry and has been runner-up in the district dairy princess contest the past 2 years. In connection with her 4-H work, she has attended state 4-H Club Congress, the Pocono Conference for Young Adults, State 4-H days at Penn State, and the PAIC Summer Institute. Through her 4-H work, Nancy developed a herd of 8 registered Holsteins.

Jim, 18, a Somerset County 4-H and FFA boy is the son of Mr and Mrs Calvin Will In 9 years of dairy project work, he has developed a herd of 15 registered Holsteins A 1965 graduate

State Grange Master Honored

HARRISBURG — John W. Scott, 13th Master of the Pennsylvania State Grange, was honored Monday — opening day of the State Farm Show — for his years of distinguished service to Pennsylvania agriculture.

At a special breakfast in the Penn Harris Hotel, Scott received New Holland Machine Company's Award of Recognition. He was the eighth recipient of the award, made annually to a state resident who has contributed significantly to the growth of agriculture in Pennsylvania. New Holland is the farm equipment manufacturing division of Sperry Rand Corporation.

M. W. Shellabarger, New Holland vice-president for marketing, presented Scott a certificate of appreciation and an engraved electric watch. Farm Show Commission members, state agricultural leaders, representatives of the press and past recipients of the award also attended the breakfast

Scott is a well known Butler County farmer, and was associated with his father in the operation of a large dairy farm when he was elected master of the State Grange in October, 1962. He was recently elected secretary of the National Grange, which he served last year as chairman of the Agricultural Committee and gatekeeper.

Scott was recently named by Leland H. Bull, Pennsylvania Secretary of Agriculture, to a committee for administering available research funds. He is also a member of the 1000 Pennsylvanians, Executive Committee of the Pennsylvania State Advisory Council, Steering committee of the Governor's Conference on Natural Beauty and the State Plowing Contest Committee. In addition, he represents the State Grange on the Rural Area Development Board.

Also active in the field of education, Scott is presently serving on the Advisory Council of the State Board of Education and the Advisory Committee for vocational and technical schools. A member of the Education Committee of the Pennsylvania State Chamber of Commerce, he is past-president of the Slippery Rock Area and Butler County School Boards.

John W. Scott

MISS IDEAL, grand champion Spotted Poland China senior gilt, gave owner C. Warren Leininger of Denver his fifth consecutive Farm Show championship this week at Harrisburg. Leininger also had the best junior gilt in the show, but lost out to Wm. M. Kauffman of York County for the reserve championship. L. F. Photo

freshman at Donegal High School. Marvin is the 14-year-old son of Mr. and Mrs. Wilmer R. Nissley, Mount Joy R1, and this was his first Farm Show effort.

Lancaster County did forge into the spotlight to take the County Trio title, however. Barry Longenecker, Marvin Nissley, and Kathy Weaver teamed up with their respective Angus entries for the win.

In the sweepstakes showmanship contest, John Frey of Quarryville took third place behind winner Earl Dehmey from Dauphin County, and runnerup Burnell Doll of York.

Judging the beef show was Robert A. Long, head of the Animal Science Department at the University of Georgia. Frank Zimmerman, herdsman at Millarden Farms, and Bill Gray, herdsman at Penn State, judged the showmanship competition.

County results:

SHORTHORN

Lightweight — 1, Mary Lou Landis; 3, Donna Hess; 4, Lynn Royer.

Morgan Ram Is Repeat Winner At Farm Show

A yearling ram, Morgan 10, shown by Mrs. Milton K. Morgan of 1916 New Holland Pike, Lancaster, captured his second consecutive Farm Show championship Monday in Suffolk breed competition.

Last year, as a young ram, he led the breed in the Farm Show event, and also finished first in his class at the Pennsylvania Livestock Exposition.

Until last year, the ram title seemed to be the permanent possession of Mrs. Ford Cooper of Jefferson County. Now a new tradition seems to be under way which hopefully will keep the title in Lancaster County.

Mrs. Morgan also showed a young ram which finished second in his class, but for the balance of the classes her entries placed second and third, with one fourth place ribbon in the young ewe class.

Crouse Takes Four Ribbons In Hay Show

Galen Crouse, Stevens R1, won Lancaster County's only ribbons in the hay show on Sunday.

Crouse, winner of the Southeastern Pennsylvania hay show championship at Hershey last summer took first-place ribbons in both later cutting alfalfa and summer annual grass categories with heat-cured entries He also won a second and third place ribbon for his heat-cured grass and field-cured summer annual grass entries, respectively.

The show's top title went to Rolling Rock Farms of Ligonier, Westmoreland County, for its late cutting timothy-and-other-grass exhibit.

Crouse, a dairyman, cures about 40 acres of altalfa and mixed hay early using a system of ducts in a converted tobacco shed using artificial heat.

The first artificial snow was produced in 1946 by Vincent J. Schaefer of Schenectady, N. Y.

Only Lanc. Beef Breed Entry Is Reserve Champ

HARRISBURG — Thomas C Daugherty, Kirkwood R1, only Lancaster Countian with entries in the Hereford Breeding Cattle, Wednesday, at the Pennsylvania Farm Show won the reserve grand champion bull rosette

Daugherty, who had the Hereford bull champion at the 1961 show, also collected three first place wins and five seconds in judging during the third day of the Farm Show. His prize money totaled $185.

The reserve grand champion bull, D D Major Colorado 5, a spring bull calf, was born last March 4. The homebred bull was sired by S. F. Colorado 8-81, out of Silver Modesty.

Daugherty, who has been breeding Herefords since 1956, said this was the first time the bull calf was entered in any show.

The calf is out of Full Sister to the entry which was chosen as the 1961 champion. The sire was from Sundown Farms, Gaithersburg, the dam was homebred.

The grand champion bull was an entry by Klips Herefords, of Montgomery County. Klips also had the grand champion female and the reserve grand champion female.

Daugherty won first places in spring bull calf summer yearling heifer, and pair of calves competition.

His second place awards included a two-year-old bull; two bulls bred and owned by exhibitor, spring yearling heifer, junior heifer calf; and get of sire classes.

The judge was M D Lacey, of Cornell University, Ithaca, N. Y.

Soleil Farms, Inc, Pottstown R2, piled up seven championships in the Angus division of beef breeding cattle at the State Farm Show.

The Chester County farm won the junior champion bull, reserve junior champion bull, senior champion bull, reserve grand champion bull, senior champion female, and reserve junior champion female, a herdsman for Soleil, had an entry that won the reserve bull calf championship

Lancaster County did not show in the Angus division because of a hand injury to the owner of the only county entries

Fred Frey, of Twin Oak Farms, Quarryville R2, suffered a severe right hand injury when a rope attached to a power takeoff looped the hand and slammed Frey against the machinery. He had registered entries for the late junior yearling and senior yearling bull classes.

Dairymen Must Control Own Industry To Solve Price Problems

HARRISBURG — Dairy farmers must build a strong organization and "keep control of it" if they are to end turmoil in the nation's dairy industry, State Senator D. Elmer Hawbaker told members of the Pennsylvania Dairymen's Association Tuesday evening.

"Dairy farmers generally throughout the country are not participating in the affluence of present day society," Sen. Hawbaker declared at the association's annual banquet, held at the Penn Harris hotel in conjunction with the 50th State Farm Show.

"In many cases," he declared, "the income level of dairy farmers is actually lower than the income of families on public assistance."

Turmoil in the industry, he said, generally involves the question of consumer price controls. There is agitation to abolish price control in states that have it. States without controls have considerable market unrest and several are considering steps to establish controls. Controversies also affect metropolitan markets operating under federal orders.

A serious problem, Sen. Hawbaker said, is the use of milk as a loss leader and traffic builder in some supermarkets "without regard for a profit for themselves or for anyone in the dairy industry."

Another disturbing factor, he said, is the changing role of dairy cooperatives that were originally organized to seek better prices for producers. "Many of these cooperatives have become giant milk dealers, competing against each other. Instead of working for a better price on behalf of producers, they are cutting the price against each other."

Some cooperatives, Sen. Hawbaker declared, "actually return a lower price to members than is received by non-members."

Efforts to cope with this problem at federal and state levels have met with little success, Sen. Hawbaker pointed out. "It seems apparent," he said, "that the real solution to the problems is in the hands of the dairy farmers themselves—if they are willing to put forth the effort to build a strong organization and to keep control of it.

The Case Of The Chicken Chicken

Who's who in the "pecking order" preoccupies laying hens so much that poultry scientists try hard to understand this aspect of social life in the henhouse. For example, previous evidence indicates that a hen's egg production and length of life relate to how aggressively she pecks.

Recently, poultry specialists at the ARS Poultry Genetics Laboratory in Athens, Ga., restudied at close range the attitude of one chicken toward another to clarify these specific points:

1 — Do chicken strains vary in aggressiveness? And does relative aggressiveness of a chicken strain change over a period of time?

2 — Is aggressiveness related to size? Do birds recognize superiors as individuals — or as belonging to a superior strain?

3 — Is aggressiveness linked to egg quantity or quality?

Relationships between strains were given special consideration in planning the study.

Poultry specialist R. E. Cook of ARS and J. C. Womack and L. D. Tindell, both formerly of the Georgia Agricultural Experiment Station, studied pairs of hens in a special observation cage. They matched birds from four strains of White Leghorns and two strains of Rhode Island Reds, in three encounters. Although the tests took on some aspects of a tournament, none of the birds was injured.

The first pairings were held when the birds were 20 weeks old, the second and third at 38 and 56 weeks. A hen earned points for aggressiveness — if she outpecked her opponent, if her pecks were uncontested, or if the other hen simply withdrew when she threatened. As soon as the researchers could judge which hen dominated the other, they returned the birds to individual cages.

The experiment clearly established that there are super strains in the chicken world. Each stock revealed a clear level of aggressiveness, which the scientists believe is carried genetically.

In general, the relative aggressiveness of a strain did not change with age. Only in the last rematch did the two least aggressive strains exchange standings.

Chickens apparently recognize breeds and strains. Rhode Island Reds clearly yielded to the much smaller White Leghorns, even though within strains the bigger bird was usually the more aggressive. Scientists were uncertain whether breed differences or individual looks were more important for a chicken in recognizing a superior in the pecking order.

Tougher strains were the better producers. The rank of strains by egg production was the same as strain-standing for henpecking, except in one case. On an individual basis also, the most aggressive birds laid the most eggs.

COUNTY GRANGES MEET

Lancaster County Pomona Grange #71 will hold their dinner meeting Saturday, January 15, 7 p.m. at Rhoads Spanish Restaurant, Quarryville. Reservations should be made through Miss Marie Murphy. There will be a memorial service in charge of Miss Murphy and the newly elected officers will be installed by Norman Maule and his team from Chester County.

Fulton Grange #66 held their regular meeting January 10 at Oakryn, Pa. Master, Gyles H. Brown conducted the business meeting. Fulton Grange was invited to attend a church service Friday evening, January 28 at the Mount Hope Methodist Church where evangelist Joseph Brookshire of Lexington, Ky., will be conducting a week of services.

Lecturer Miss Agnes Spence, presented a Stephen Foster program. Group singing, "Old Folks at Home" and "My Old Kentucky Home." The "Life History of Stephen Foster" was told by Paul H. Uibel. Chester Todd Jr. Mrs. Stanley Stauffer Jr. and Mrs. Ralph Armstrong demonstrated the presentation of the American flag.

The next meeting will be held January 24.

By Mrs. Richard C. Spence, Food Editor

TIME TO FUSS . . .

SPENCE

Now that the holiday season is over and we have time to catch our breath we can think about the things we've been wanting to do but have put off because there wasn't time. Christmas baking always takes up so much time that we don't do too much fussing with main dish eating. Long-simmering stews and soups — we don't even think about them!

In the next few weeks before the busy springtime season starts try either this Old-Fashioned Hearty Chicken Soup or the Browned Beef-Dumpling Stew. They will be well-worth the time it takes to make them.

BROWNED BEEF-DUMPLING STEW

- 2¼ cup all-purpose flour
- 2 teaspoons salt
- ¼ teaspoon ground black pepper
- 3 pounds boneless chuck or rump of beef, cut in approximately 1x1½ inch pieces
- ½ cup butter or margarine (1 stick, cut in 3 portions)
- 3 cups cold water
- 12 white onions, peeled
- 6 to 8 carrots, cut in 2 to 2½ inch lengths
- 2 stalks celery (without leaves) cut in ½-inch lengths
- 8 small potatoes, pared

DUMPLINGS:

- 2 eggs well beaten
- 1 cup 100% bran flakes
- ¼ cup milk
- ⅔ cup sifted all-purpose flour
- 1½ teaspoons baking powder
- ½ teaspoon salt
- ½ teaspoon marjoram leaves
- ¼ teaspoon thyme leaves
- 2 tablespoons butter or margarine

To prepare stew: Combine ½ cup flour, 1 teaspoon salt and pepper in a plastic or paper bag. Add meat, shake to coat evenly. (Reserve leftover flour.) In a Dutch oven melt ¼ of butter or margarine. Brown ½ meat well on both sides. Set aside. Repeat. Heat remaining ¼ of butter or margarine. Blend in remaining ¼ cup flour and reserved seasoned flour. Brown slowly, stirring constantly with a wooden spoon. When rich brown in color, remove from heat. Gradually stir in water. Bring to a boil, stirring constantly. Add meat and remaining 1 teaspoon salt. Simmer gently for 1 hour, stirring occasionally to avoid sticking on the bottom. Add vegetables. If necessary, stir in more water. Cover and cook 1 hour longer or until meat and vegetables are tender. Fifteen minutes before stew is done drop in dumplings.

To prepare dumplings: Combine first three ingredients. Sift next five ingredients into a separate bowl. Cut in butter or margarine until mixture resembles coarse meal. Stir in bran mixture. Drop batter about 1 tablespoon at a time over top of hot stew; cover. Cook 15 minutes without lifting lid. Makes 16 dumplings and 8 to 10 servings of stew.

* * *

OLD-FASHIONED HEARTY CHICKEN SOUP

- 3 to 3½ pound stewing chicken, cut into 6 to 8 pieces
- 3 cups thinly sliced, pared potatoes (4 to 5 potatoes)
- 2 medium onions, thinly sliced
- 1 cup chopped celery tops
- 2 quarts cold water
- 2 bay leaves
- 4 whole black peppercorns
- 2 whole cloves
- 2 whole allspice
- 1 teaspoon salt
- 1 ham bone, remove all meat and marrow (optional)
- ¼ cup butter or margarine
- ½ cup all-purpose flour
- 1½ cups light cream
- 1 (4-ounce) jar pimiento, cut into large pieces

Place first ten ingredients in a 5-quart saucepan with ham bone, if desired. Cover. Bring slowly to a boil. Simmer gently covered, 3½ to 4 hours. (Meat will fall off bones.) Remove from heat. Reserve about 1 cup large chicken pieces. Discard ham bone. Strain soup; use a wooden spoon to force as much as possible through strainer. (There will be about 6 cups.) Melt butter or margarine; blend in flour and cook 1 to 2 minutes. Gradually stir in soup. Bring to a boil, stirring constantly. Stir in cream, reserved chicken pieces and pimiento. Add more seasoning, if desired. Reheat; do not boil. Serve with crackers. Makes 8 servings.

* * *

Serve spinach as in these Spinach Timbales. They may be quickly and easily assembled well in advance and refrigerated until baking time.

SPINACH TIMBALES

- 2 tablespoons butter or margarine
- 2 tablespoons finely chopped onion
- 1 (10-ounce) package chopped spinach, thawed
- 5 eggs
- ½ cup grated Swiss cheese
- 16 Waverly wafer crackers, finely rolled, (about ⅔ cup crumbs)
- 1 cup hot milk
- ¼ teaspoon ground nutmeg
- ¼ teaspoon salt
- ⅛ teaspoon ground black pepper

Melt butter or margarine in a small saucepan. Saute onion until soft. Squeeze all water from spinach; chop very finely. Add to onion. Cover; cook 5 minutes. Beat eggs until foamy. Add cheese and cracker crumbs. Slowly stir in milk; slowly stir in spinach. Add seasonings. Pour into 4 to 6 buttered individual baking dishes or custard cups, filling each ¾ inch from top. If desired, refrigerate until baking time. Set in shallow baking pan. Fill pan with hot water to ½-inch from top of dishes. Bake on low rack in a preheated moderate oven (350 degrees) 25 to 35 minutes or until silver knife inserted into center comes out clean. (If refrigerated before baking, bake 40

Watch for these signals of "below-par" tractor performance

What can be the cause? Could be worn bearings, excessive carbon in the engine, poor ignition timing.

Our skilled mechanics are equipped with precision tools to correct poor compression, leaky valves, worn rings.

Lack of power may be due to excessive carbon, an obstruction in the fuel system, or sluggish engine speed.

Our Service Department can quickly determine whether off-color exhaust smoke is due to improper carburetor adjustment, clogged air cleaner, or other malfunction.

High oil consumption can be traced to one of several sources — worn piston rings . . . too much oil pressure . . . worn connecting rods.

Ignition out of time, improper carburetor adjustment, and improper valve clearance are a few of the reasons for poor fuel economy.

Let our John Deere Service put your power on the right track!

Double-barrelled pork builder:

WAYNE PIG BALANCER "400"

Your own grain and Wayne Pig Balancer "400" is a real double-barrelled pork builder for shoats from 50 to 120 lbs. Contains the same outstanding nutrient blend as the famous regular Wayne Pig Balancer (40% protein) but with a high level of a unique antibiotic combination.

Its quality ingredients will balance your pig ration with the amino acids, vitamins and minerals lacking in grain alone. Its high antibiotic level makes it especially valuable for commercial hog lots with chronic disease problems.

You can use Wayne Pig Balancer "400" in either free choice or grind and mix programs. Either way your pigs will hit 120 lbs. quickly and efficiently, ready to finish out profitably.

Come in now and get the complete story on Wayne Pig Balancer "400".

1 10-ounce package frozen asparagus spears
1 cup dairy sour cream
1 tablespoon finely chopped onion
1 teaspoon vinegar
2 tablespoons crumbled Blue cheese
1 teaspoon salt
1 tablespoon butter

Cook corn and asparagus separately in unsalted water. In a small saucepan, blend sour cream with onion, vinegar, Blue cheese and salt. Stir over low heat until hot. Drain vegetables thoroughly; arrange on hot platter and dot with butter. Pour hot sauce over vegetables.

This hot sour cream sauce is delicious also served on hot baked potato, broccoli, or green beans.

Buying Tip for Appliance Gift — When selecting a small electric cooking appliance for a gift, consider versatility. An appliance that will do several different jobs may be a better choice for a newly married couple than an appliance that does only one job.

Sir Ronald Ross, a British physician, won the 1902 Nobel medicine prize for showing that mosquitoes transmit malaria, reports World Book Encyclopedia. Ross made the discovery in 1898, studying malaria in birds.

For the Farm Wife and Family

By Doris Thomas, Extension Home Economist

Ladies, Have You Heard? . . .

THOMAS

Do You Know

Well-chosen snacks can contribute to dental health and good nutrition. For the best dental health, it's recommended that you cut down on eating sweets between meals.

Nutrition research has established milk as one of our most valuable foods Milk is the richest source of calcium of the foods commonly eaten in the United States

Pasteurized-process cheese is a blend of one or more types of cheese, as described on the label. The processing gives a cheese that melts readily and smoothly Cheese spreads and cheese foods are softer forms of process cheese, and often have added nonfat dry milk and flavor ingredients Such as olives or pimientos.

Some Hints to Help Improve Ironing Skills

Always be sure clothes are clean before you iron them. Wash anything slightly soiled before ironing it.

Iron with a clean iron. If starch sticks to the soleplate, let the iron cool, then wipe it with a cloth dipped in soap or detergent suds Rinse and wipe dry before heating.

Wash ironing board cover as needed to remove starch, lint, and dye transferred from dark clothes Wash a new cover before using it to remove sizing . . . sizing scorches at low heat.

Cover an ironing board when not in use to help keep the cover clean. You can use a fitted washable plastic cover or a paper or plastic garment bag

Fold dampened clothes lightly instead of rolling them . . . fewer wrinkles will get set into the damp fabric, and less ironing will be needed. If you put dampened garments into a plastic bag, the moisture will be distributed more evenly. Plastic bags are handy to keep non-colorfast articles separate from others while they're damp.

If you think . . .

MARTIN'S GRAIN SPROUTING GRASS GROWING UNITS

are not exceptionally profitable, money wise and labor wise, you have a pleasant surprise awaiting. Users report they pay for themselves in 1¼ to 1½ years, (what else does) by 10 to 20% higher production, much less protein and total feed required, because this 21% protein, highly nutritious vitamin, mineral and enzyme rich Hydroponic grass causes poultry and livestock to assimilate and digest better what they do eat, reducing roughage requirements ⅓, thereby also eliminating much labor.

COSTS ONLY $9 TO $12 PER TON

to produce. Grows 8" high in 7 days. Automatic sprinkling and temperature control.

POULTRY mortality drops quickly, egg shells improve, "pocket book drain" ailments like acetonemia and many others are prevented.

Stronger calves at birth. Herd and flock health is the secret of profits. You can have it supremely at less cost than the conventional way by a wide margin. Breeders especially benefit with the increase instead of decrease in health of succeeding generations. More spark of life to transmit.

Let us show you numerous pleased users locally and in neighboring counties. Free literature with plenty testimonials. Our units manufactured in Lebanon County with outstanding improvements.

U. S. Fall Pig Crop Down, But Pa. Numbers Up

LARGER FALL PIG CROP IN PA.

Pennsylvania had a fall pig crop of 312,000, according to the Pennsylvania Crop Reporting Service. This was about 1 percent more than the fall 1964 crop of 308,000 but 18 percent below the 5-year (1959-63) average. There were only 40,000 sows farrowed, smallest number of record for a fall crop. This was more than offset by a record high 7.8 pigs saved per litter.

Total pigs saved from the combined spring and fall 1965 crops was 627,000 — smallest annual pig crop since 1934. This was down 3 percent from the 1964 total of 646,000 and 22 percent below the 5-year average. Sow farrowings by months this fall were: June, 5,000; July 6,000; August 9,000; September 10,000; October 6,000 and November 4,000.

Intended farrowings for the spring of 1966 with 44,000 sows compares with 42,000 in the spring of 1965 and a 5-year (1959-63) average of 59,000.

U.S. 1965 PIG CROP DOWN

The June-November 1965 pig crop is estimated at 38,558.000 head, 5 percent less than the 1964 crop. The South Atlantic States showed an increase of 5 percent and the South Central States were up 4 percent However these increases were not enough to offset declines f 9 percent in the East North Central region and 5 percent in each of the North Atlantic, West North Central and Western regions.

The 5,299,000 sows farrowed during the June-November 1965 period was 6 percent less than a year earlier. These farrowings compare with the 7 percent decline indicated by the June 1, 1965 report on breeding intentions. Generally, the report as of June 1, 1965 indicated fewer sows to farrow during the June-November period in all areas of the Nation. However, the South Atlantic and South Central regions each show a 3 percent increase in actual farrowings as of December 1. June-November actual farrowings and June-November intentions reported last June as a percentage of a year earlier by regions are: North Atlantic, 94 percent now and 94 percent in June; East North Central 90 and 89; West North Central 94 and 94; South Atlantic 103 and 100; South Central 103 and 96; West 93 and 100.

There was a record average litter size of 7.28 pigs from the June-November 1965 farrowings. The previous record was 7.23 pigs per litter in 1963. Weather conditions for farrowings were favorable during the June-November 1965 period and there was no serious outbreak of disease. These factors contributed to the increase in the average litter size.

The number of sows farrowing was less than a year earlier during all months of the June-November 1965 period except for a 5 percent increase in November. The declines are as follows: June 7 percent; July, 8 percent; August, 9 percent; September, 6 percent, and October, 2 percent.

PIGS DOWN 8% 1965

The total pig crop for the December 1964 — November 1965 period in the U. S. was 81,638.000 head, 8% less than the preceding annual total. The annual pig crop in the 10 Corn Belt States totaled 62,806,000 head, 9 percent less than a year earlier.

1966 SOW INTENTIONS IN U. S.

U. S. Hog farmers reported intentions to farrow 6,342,000 sows during the December 1965-May 1966 period, 6 percent more than a year earlier but 12 percent less than the average. Increases in sow farrowings from December-May last year are indicated in all regions as follows: South Atlantic and South Central each up 13 percent; West, 7 percent; East North Central, 6 percent; West North Central, 5 percent; and North Atlantic region, up 2 percent.

If these intentions are realized and the number of pigs saved per litter follows the trend of recent years, the December-May 1966 pig crop would approximate 46.0 million head. This would be 7 percent more than in the December 1964-May 1965 pig crop.

Sows bred and intended for farrowing in the 10 Corn Belt States during December 1965, January and February 1966, total 1,657,000 head, 5 percent more than a year earlier. All States except Wisconsin show increases compared with a year earlier. Expected farrowings by months in these 10 States are: December, 420,000 sows, up 8 percent; January, 528,000 sows, up 4 percent; and February, 709,000 sows, up 3 percent.

Reported breeding intentions indicate 3,244,000 sows to farrow in the March-May quarter in the 10 States. This would be 5 percent more than a year earlier. All 10 States show increases compared with a year earlier, ranging from 3 percent in Ohio, Wisconsin, Missouri, and Nebraska each to 10 percent in Indiana.

WHAT YOUR CAR COSTS YOU

Just resting in the garage, your car costs you $2.17 a day. This is the fixed cost of owning an average eight-cylinder, four-door sedan, according to the American Automobile Association. It figures to $792 a year, including $30 for fire and theft insurance, $117 for property damage and liability, $24 for licensing and registration, and $621 in depreciation. Once on the highway, the cost is increased by 3.7 cents a mile — 2.61 cents for gas and oil, .68 for maintenance, and .41 cents for tires.

Plant Corn Early, Agronomist Tells Crop Improvement Assn. Members

HARRISBURG — Pennsylvania farmers are growing more corn per acre than ever before because of improved production practices, Clarence S Bryner, extension agronomist at the Pennsylvania State University, told members of the Pennsylvania Crop Improvement Association meeting in Harrisburg Tuesday.

"Average yields in 1965 were 65 bushels of shelled corn per acre even though moisture was somewhat limited in growing areas in the eastern part of the state. Many farmers are producing over 100 bushels per a re on their cropland," Bryner said

Farmers are using better hybrids, planting thicker stands, and fertilizing heavier than ever before, but he pointed out that other production practices are equally as important. Late fall or early spring plowing has been paying off when late May June, and July has been dry This practice has given better seedbeds under these dry conditions

Early plowing, Bryner said, makes it possible to plant corn earlier. Farmers in the more productive corn areas should try to plant corn one week to 10 days earlier than the usual corn planting time.

Farmers who are interested in thicker stands should plant at slower speeds—not over 3 miles per hour—and make sure the low fertilizer, which is always recommended, is placed away from the seed He reported that fast planting and fertilizer injury are the reasons for many, if not most, poor stands

Firm Offers New "Worm-War" Movie

A 25-minute movie about *controlling parasitic worms in* sheep is available for booking from Merck & Co, Inc.

Highly regarded by the sheep industry, the full-color film has many unusual highlights Scenes include living parasites in internal tissues and live infective larvae in a droplet of moisture on a blade of grass

Some sequences are considered so outstanding that they have been given special recognition by the World's Veterinary Congress

Organizations interested in seeing the movie "Winning the Worm War" should write to Animal Health Products, Merck & Co, Inc, Rahway, N.J.

Supply Type 41 Cigar Filler At Four-Year Low

According to the "Tobacco Situation," published quarterly by the USDA's Economic Research Service, the 1965-66 carryover stocks of Pennsylvania cigar filler are about 3 percent below the 1964-65 level, hitting a four-year low level The sizable drop in carryover more than offset the moderate increase in the 1965 crop from a year earlier

This favorable situation resulted from the stepped up disappearance rate of the Pennsylvania filler in the October 1964-September 1965 period At over 54½ million pounds, disappearance is at its second highest level in twenty years.

The major use, the report states, was in cigars, and a secondary outlet was scrap chewing tobacco.

Meanwhile, exports appeared to account for a relatively small part of this total disappearance of stocks.

In number of acres planted in the 1965 crop year, Type 41 tobacco was unchanged from the 1964 figure of 27,000.

Making Blue Prints For
YOUR FUTURE?

Today, more than ever before, poultrymen must plan ahead.

It takes a sharp pencil and a careful analysis of the situation to make the decisions every poultryman must make to KEEP AHEAD of the competition.
